

DESCRIPTION

The new Geemarc alarm clock with lamp will change the way you wake up every morning. Thanks to its simulated "Sunrise" function, the LED light gradually becomes brighter like a rising sun, allowing your eyes to slowly become accustomed to the light conditions and your body to gently prepare itself for waking up. Along with the simulated sunrise, choose between the radio, a beep, five natural sounds or you can select the shaker option. The Wake 'n' Shake Light provides a rested and pleasant start to your day.

FEATURES
